An affiliate of Benefit Street acquired BDCA Adviser on November 1, 2016. The investments, portfolio characteristics and performance shown for periods prior to this date are for investments, portfolio characteristics and performance achieved by BDCA Adviser prior to this acquisition. As a result, there is no guarantee that BDCA Adviser will make similar investments or that BDCA will achieve similar portfolio characteristics or performance as it achieved for periods prior to such date. On February 1, 2019, Franklin Templeton completed its acquisition of BSP, including BSP's 100% ownership interest in our Adviser (the "FT Transaction"). All investment professionals currently managing us and our investments, and all members of the BSP's Investment Committee are expected to maintain their current responsibilities after the FT Transaction.

AUM refers to the assets under management for funds and separately managed accounts managed by BDCA Adviser and Benefit Street (collectively, "BSP"). For private debt funds and other drawdown funds and separately managed accounts, AUM generally represents the sum of the total investments at fair value plus available capital (undrawn commitments plus distributions subject to recall). For hedge funds and non-drawdown funds and separately managed accounts, AUM represents the NAV (net asset value) of each fund or separately managed account. For CLOs, AUM represents the total amount of the debt tranches and subordinated notes (equity) at closing. For long-only liquid accounts, AUM represents the gross asset value of the investments managed by Providence. AUM amounts are unaudited. Certain amounts are preliminary and remain subject to change.

Benefit Street's private debt/opportunistic credit strategy refers to certain accounts that invest in an opportunistic private debt strategy and are managed by Benefit Street. BDCA has different investment restrictions, risk tolerances, tax approaches, leverage limitations, regulatory and fund structures than that of the accounts comprising the private debt strategy and was invested under different market conditions than the funds and separately managed accounts comprising the private debt strategy, and as such, the performance and portfolio characteristics of the accounts comprising these strategies should not be considered indicative of BDCA's prospects.

Certain information contained in this presentation (including financial information) has been obtained from published and non-published sources. Such information has not been independently verified by BDCA, Benefit Street or their affiliates, and BDCA, Benefit Street and their affiliates make no representations concerning and do not assume responsibility for the accuracy of such information. Except where otherwise indicated in this presentation, the information provided is based on matters as it exists as of the date of preparation and not as of any future date. Such information will not be updated or otherwise revised to reflect information that subsequently becomes available, or circumstances existing or changes occurring after the date of this presentation.

Total combined Assets Under Management (Total AUM) combines U.S. and non-U.S. AUM of the investment management subsidiaries of the parent company, Franklin Resources, Inc. (FRI) [NYSE: BEN], a global investment management organization operating as FT. Only selected business entities within FT claim compliance with the GIPS standards as described in the table of contents if applicable. Total and platform AUM includes discretionary and non-discretionary accounts, including pooled investment vehicles, separate accounts and other vehicles. Total and platform AUM may also include advisory accounts with or without trading authority. In addition, assets for which certain FT advisers provide limited asset allocation advisory services, and assets that are not allocated to FT products are not included in the AUM figures shown. Franklin Templeton Multi-Asset Solutions may invest in various investment platforms advised by a number of investment advisory entities within FT. Platform AUM reported for FT Multi-Asset Solutions therefore may include certain AUM separately reported under each utilized investment platform. The following is a summary of risk factors for Business Development Corporation of America.

- You should not expect to be able to sell your shares regardless of how we perform.
- If you are able to sell your shares, you will likely receive less than your purchase price.
- Our adviser and its affiliates, including our officers and some of our directors, will face conflicts of interest caused by compensation arrangements with us and our affiliates, which could result in actions that are not in the best interests of our stockholders.
- We do not intend to list our shares on any securities exchange during or for what may be a significant time after the offering period, and we do not expect a secondary market in the shares to develop.
- We may borrow funds to make investments. As a result, we would be exposed to the risks of borrowing, also known as leverage, which may be considered a speculative investment technique. Leverage increases the volatility of investments by magnifying the potential for gain and loss on amounts invested, thereby increasing the risks associated with investing in our securities. Moreover, any assets we may acquire with leverage will be subject to management fees payable to our Adviser; thus our Adviser may have an incentive to increase portfolio leverage in order to earn higher management fees.
- Because you will be unable to sell your shares, you will be unable to reduce your exposure in any market downturn.
- Our distributions may be funded from any sources of funds available to us, including offering proceeds and borrowings as well as expense support payments from our Adviser that are subject to reimbursement to it, which may constitute a return of capital and reduce the amount of capital available to us for investment. We have not established limits on the amount of funds we may use from available sources to make distributions. The Adviser has no obligation to make expense support payments in the future. Any capital returned to stockholders through distributions will be distributed after payment of fees and expenses. Our Adviser may also waive reimbursements by us for certain expenses paid by it to fund our distributions. The waived reimbursements may be subject to repayment in the future, reducing future distributions to which our stockholders may be entitled.
- **For more detailed information on risks relating to BDCA, see the latest Form 10-K and quarterly reports filed on Form 10-Q.**

Note: Please note that the above factors should not be relied upon as a comprehensive and complete list of all risk factors. Certain schedules may not foot due to rounding.
