On February 1, 2019, Franklin Templeton completed its acquisition of BSP, including BSP's 100% ownership interest in our Adviser (the "FT Transaction"). All investment professionals managing us and our investments, and all members of the BSP's Investment Committee maintained their respective responsibilities after the closing of the FT Transaction.

AUM refers to the assets under management for funds and separately managed accounts managed by Benefit Street. For private debt funds and other drawdown funds and separately managed accounts, AUM generally represents the sum of the total investments at fair value plus available capital (undrawn commitments plus distributions subject to recall). For hedge funds and non-drawdown funds and separately managed accounts, AUM represents the NAV (net asset value) of each fund or separately managed account. For collateralized loan obligations, AUM represents the total amount of the debt tranches and subordinated notes (equity) at closing. For long-only liquid accounts, AUM represents the gross asset value of the investments managed by BSP. AUM amounts are unaudited. Certain amounts are preliminary and remain subject to change.

Benefit Street's private debt/opportunistic credit strategy refers to certain accounts that invest in an opportunistic private debt strategy and are managed by Benefit Street. FBLC has different investment restrictions, risk tolerances, tax approaches, leverage limitations, regulatory and fund structures than that of the accounts comprising the private debt strategy and was invested under different market conditions than the private funds and separately managed accounts comprising the private debt strategy, and as such, the performance and portfolio characteristics of the accounts comprising these strategies should not be considered indicative of FBLC's prospects.

The following is a summary of risk factors for Franklin BSP Lending Corporation and investing in its common stock.

- There are significant potential conflicts of interest that could impact our investment returns. The time and resources that individuals and the executive officers of our Adviser devote to us may be diverted, and we may face additional competition due to the fact that neither our Adviser, nor its affiliates, is prohibited from raising money for or managing another entity that makes the same types of investments that we target.
- Our shares will not be listed on an exchange or quoted through a quotation system for the foreseeable future, if ever. Therefore, you will have limited liquidity and may not receive a full return of your invested capital if you sell your shares.
- Because we borrow money, the potential for gain or loss on amounts invested in us will be magnified and may increase the risk of investing in us.
- As a result of certain limitations in our share repurchase program, you will have limited opportunities to sell your shares and, to the extent you are able to sell your shares under the program, you may not be able to recover the amount of your investment in our shares.
- The amount of any distributions we pay is uncertain. Our distributions to our stockholders may exceed our earnings. Therefore, portions of the distributions that we pay may represent a return of capital to you which will lower your tax basis in your shares and reduce the amount of funds we have for investment in targeted assets. We may not be able to pay you distributions, and our distributions may not grow over time. We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.
